

MEDICAL DISABILITY DOCUMENTATION REQUEST FORM

In accordance with the Americans with Disabilities Act (ADA) of 1990 as amended, Section 504 of the Rehabilitation Act of 1973 (Section 504), and the State of Maryland Laws Against Discrimination, Salisbury University (the "University") provides reasonable accommodations to students with disabilities. In order to do so, students submit all accommodation requests to the University's Disability Resource Center ("DRC").

Students requesting accommodations should submit documentation that clearly demonstrates that (1) the student has a physical or mental impairment, and (2) the impairment prevents the normal exercise of any bodily or mental functions (or can be shown to exist through accepted clinical or laboratory diagnostic tests), as compared to most people in the general population. A diagnosis of a disorder, or submission of an evaluation, does not automatically qualify an individual for accommodations.

This **Medical Disability Documentation Request Form** requests information necessary to determine the impact of a medical disability on the student's ability to participate in the University's educational programs and to validate the need for accommodation(s). A treating certified medical professional **must** complete this form or provide equivalent information on professional letterhead. A qualified professional is defined as an individual who is licensed or is a formally recognized expert in the medical, psychological, and/or educational field with the authority to make diagnoses and/or recommendations in their specific field of practice. Accommodations are determined through an interactive process that includes an intake interview.

The Family Educational Rights and Privacy Act of 1974 ("FERPA"), 20 U.S.C. §1232g et seq., is a federal law that protects the privacy of student education records, which includes DRC records. FERPA regulations may be found at 34 C.F.R. 99.31. The University may not disclose FERPA protected information without the prior consent of its student or former student whose records would be disclosed unless a valid exception exists under FERPA. An unauthorized disclosure of information related to an individual's disability is unlawful and may result in civil damages and/or criminal penalties. An unauthorized disclosure of information related to an individual's disability is unlawful and may result in civil damages and/or criminal penalties.

Upon completion, please either fax or email to the DRC:
